

Full Stack Web Developer

As a leading provider of software and solutions to broadcasters worldwide, Pebble Beach Systems delivers the technology which controls the playout of over 600 TV channels in more than 50 countries. We are a young, expanding company based in Weybridge Surrey, and have offices in Denver, Dubai and Singapore.

Since the company was founded in 2000, we have established a strong reputation for technical innovation and exceptional customer service in the mission-critical space of broadcast playout. Customers include Fox News and Business channels USA, ZDF Germany, Globosat Brazil, OSN Dubai, TV4 Sweden, TV2 Denmark, ART Jordan and Phoenix TV Hong Kong.

The Role

We are currently looking for a Full-Stack Developer to join our new product development team in Weybridge. You will be working on our web client system, helping develop new functionality and improving the current product based upon continuous customer feedback. You will also be a key member of the team developing our next generation of software products as we look to expand into the cloud.

We are looking for a positive, self-motivated individual who is able to work alone or as part of a team, with 3-5 years' experience in software and web development throughout the complete development lifecycle.

Responsibilities include

- Investigating, designing and implementing solutions to problems and new feature requirements
- Finding, reporting and fixing defects, working with our support team to help diagnose and fix customer issues when needed
- Helping contribute to the continuous improvement of our development practices

Minimum skills/Experience

- BA/BSc degree in Computer Science, related technical field or equivalent practical experience
- Experience developing web applications using JavaScript, HTML and CSS, and back-end systems using Node.js, Java or similar.
- Experience with at least one modern JavaScript framework (AngularJS/2+, React, Vue.js)
- Experience using and developing REST APIs
- Experience with version control systems (Git, SVN), agile methodologies and continuous integration tools.
- Good written and verbal communication skills

Desirable skills

- Experience with JavaScript superset languages such as Typescript
- Experience implementing web security and best practices
- Experience with performance optimisation techniques
- Familiarity with ES6+ features
- Familiarity with SQL (MySQL, SQL Server) and NoSQL (MongoDB, Redis) databases
- Familiarity with Test Driven Development (TDD) or Behaviour Driven Development (BDD) techniques
- Familiarity with microservices architecture and cloud-based systems

Essential criteria

- UK applicants must hold a valid passport with the unrestricted right to live and work in the UK and travel internationally

In return we offer

- Excellent benefits and a fantastic working environment
- Sports teams like Basketball, Football, Squash and many more
- Quarterly company socials like go-karting, wine tasting, rock climbing, theme park days and more!
- Games nights, Hackathons and regular tech events
