

JOB DESCRIPTION

Role Title:	QA Software Developer In Test
Department:	R&D
Line Manager:	Product Release Manager
Employment:	Permanent, Full time (37.5 hours/week)
Location:	Remote (Home Based) Worker (with occasional travel to other locations as required)

Pebble Beach Systems Limited, trading as Pebble, is a leading provider of software and solutions to broadcasters worldwide; we deliver the technology which controls the playout of nearly 2000 TV channels in more than 50 countries worldwide. We are an established, expanding global company with a head office based in Epsom, Surrey, UK.

Since the company was founded in 2000, we have established a strong reputation for technical innovation and exceptional customer service in the mission-critical space of broadcast playout. Customers include Encompass USA, ZDF Germany, Globo Brazil, MBC Dubai, Bloomberg UK, TV2 Denmark, ART Jordan and Phoenix TV Hong Kong.

This is an exciting time for the Pebble business as we gear up to launch a number of new products and enhancements, expands into new markets, and enhance our digital and online presence and promotional activities.

The Role:

Pebble is seeking a mid-level software developer in test to join our established Product Release department. The role will focus on expansion of the existing test framework.

Responsibilities:

The role holder will:

- Work with other Software Developers in Test and QA engineers during the development life cycle to catch potential issues early on during the development cycle.
 - Communicate with other departments such as project management and engineering to coordinate scheduling for QA testing.
 - Write Test Cases to cover the testing requirements of a piece of development.
 - Create and maintain automated test cases and monitor tests outputs.
 - Work together with the Product Release team to assess product problems and brainstorm solutions.
-

Experience and Qualifications:

The ideal candidate will have:

- Proficiency in JS / Typescript
- Docker, Kubernetes and Service Orientated architectures.
- Public Cloud deployment using Amazon Web Services or Microsoft Azure
- Industrial experience working with developers whilst creating automation test, environments, and frameworks.
- Strong knowledge of software testing methodology and hands-on application test experience
- Able to identify deficiencies and extend the depth of test coverage and be able to anticipate problems in advance.
- Able to make recommendations for improving products, systems, and processes.
- Able to juggle multiple priorities and deliver successfully in a fast-paced environment.

Ideally, the role holder will also have Experience/Knowledge of:

- The Broadcast industry, with an understanding of Media playout, Ingest, Automation and Orchestration
- Agile teams and Scrum
- Atlassian suite of tools (JIRA, Confluence, Bamboo, Bitbucket/Git)

What we can offer you:

Regular objectives reviews, with the aim of developing the individual and their career path. Pebble offers a range of great benefits including a pension scheme, life assurance, Income Protection Insurance and a share incentive plan scheme.

A friendly and supportive working environment with real opportunities to excel and make a difference.

If this sounds like an opportunity you would like to explore further, please apply now by sending your up-to-date CV and a covering letter (which highlights how your skills and experience match the requirements of the role) to Human Resource at HR@pebble.tv

Pebble adopts a formal equal opportunities policy. We aim to ensure no job applicant, employee or worker is discriminated against either directly or indirectly on the grounds of age, disability, gender reassignment, marriage and civil partnership, pregnancy or maternity, race, religion or belief, sex or sexual orientation.
